

Keeping Our Offices Safe for Everyone...

Your health and well-being is our highest priority! We are taking these steps to keep you, other patients and our providers and staff safe.

Social Distancing

- When not directly providing care, we keep our distance.
- We have reduced the number of appointments to promote better social distancing.
- Our waiting room seating is spaced so you are properly distanced from others.
- Please visit us alone unless you need assistance — fewer visitors increases better protection for everyone.

A Mask for All Staff, Patients and Visitors

- We wear masks to protect others; for this reason, we ask that everyone wears a mask.

Frequent Cleaning and Hand Washing

- We clean and disinfect exam rooms and equipment between each patient.
- We ask that patients/visitors use our hand sanitizers and talk to staff about hand washing.

Everyone — Including Staff, Patients and Visitors — Will Be Screened for Illness.

- Before entering our locations, you will be asked screening questions and have your temperature taken.
- You will also be asked to use hand sanitizer before entering, and we will provide you with a new mask and, if wearing gloves, a new pair.
